DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a package with via contacts, classified in class 257, subclass 774.
- II. Claims 11-22, drawn to a method of making a semiconducting package with via contacts, classified in class 438, subclass 629.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case said external bonding pads at the other wafer surface could have preceded the process of bonding said cap structure on the opposing surface.
